## RELEVANT PROJECTS

Class Schedule Builder, Independent Project

Summer 2022

- Developed an application using Python and Selenium to automatically build a student's course schedule
- Scrapes student course information from the university website and builds a schedule matrix
- Designed to streamline the student course planning process

Tuition Comparison App, Group Project

Fall 2022

- Designed a solution to streamline the college/university selection process for students
- Worked with a small team while using Agile Scrum methodologies
- Developed using C#, Windows Forms, and SQL

## LEADERSHIP EXPERIENCE

SNHU Peer Educator

August 2022 - Present

- Develop connections with computer science tutees during drop-in tutoring six hours weekly to help peers stay on track in coursework and consistently improve tutoring effectiveness

SNHU Learning Fellow

August 2022 – December 2022

- Worked with both a computer science professor and 20+ students enrolled in Introduction to Programming to improve quality of learning during class by filling in the gaps between instruction group work
- Met with the professor and other learning fellows weekly to brainstorm and discuss possible strategies and adjustments to apply to course experiments that could better support student learning

## ADDITIONAL EXPERIENCE

White Mountain Athletic Club

Waterville Valley, NH

Front Desk Associate

August 2020 - Present

- Demonstrate professional communication skills while handling phone calls pertaining to membership questions or concerns and address in a timely manner as needed
- Provide tour of facilities, including pools, tennis courts, and weight room to prospective members as requested and discuss membership levels based on needs
- Develop relationships with members to provide a welcoming environment and entice membership renewal
- Entrusted to oversee facilities while manager is not present
